## **P376 flexi-cam**

Pearpoint, Inc., the world leader in the development and manufacturing of video pipeline inspection equipment is pleased to announce the launch of its **P376 flexi-cam**. This newest addition to Pearpoint's portable inspection system line is a fully self-contained hand-held unit for inspections in lines 25mm to 100mm.

Some of the outstanding features of this state-of-the-art camera include: hand-held portability, built-in LCD screen, battery powered (rechargeable), external video recorder connection, 360 TVL resolution, CMOS camera technology, maintenance free white LEDs, manually set focus and self-retracting 15M *Flexirod*.

The patented design of the *Flexirod* allows the camera to be pushed like a solid rod but with the ability to negotiate bends. The system is easy-to-operate, maintain and clean and both the camera and rod are fully replaceable. The rechargeable battery system allows for 5 hours of continuous

use from one charge.

The system is ideal for basic inspection applications such as water pipes, pest control, drains and conduits.
